Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 40 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by De Cesare (4,883,997).

As recited in claims 1 and 40, De Cesare discloses a brushless DC motor, comprising; a rotor assembly (18) including a rotatable shaft having a permanent magnet affixed to the shaft; a plurality of coils (24a and 24b) for producing a magnetic field for applying a torque to the rotor assembly, said coils including end turns that enclose the rotor assembly such that the rotor assembly is not removable; a stator stack (12, 14) made of a stator magnetic material for providing a magnetic flux return path; and a seal applied to the interface being adapted to seal the air gap such that the air gap is blocked off as discussed in column 6, lines 51-62, wherein the coils seal the gap.

As recited in claim 41, De Cesare discloses the DC motor, wherein the encapsulated stator further includes a winding form (118) that encircles the rotor assembly such that an air gap is maintained between the winding form (118) and the rotor assembly, the winding form (118) being configured to receive the plurality of coils (figure 17).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 42 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Cesare.

De Cesare is discussed above. De Cesare does not disclose a tube and a plurality of teeth.

However, with respect to claims 42 and 43, Official Notice is taken with respect to it being well known in the art to provide a winding form which further includes a tube, a plurality of teeth.

It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize the well known teachings, with De Cesare, because it merely provides another design for applying the coils over the coil form.

Allowable Subject Matter

5. Claims 1, 3-13, and 44-49 are allowed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
